### **DETAILED ACTION**

1. Claims 1-16 are presented for examination, claims 1 and 10 independent.

### ***Priority/Declaration***

2. Applicant's claim of Priority is insufficient. Applicant has indicated the provisional application as 60/474,014, however this Application is directed towards fabricating high density flexible substrates. It is believed Applicant intended to cite provisional Application 60/474,015, and this is an inadvertent typographical error. Applicant is requested to amend the first paragraph of the specification, execute a new Oath/Declaration with the correct provisional Application number, and conform to the other requirements dictated in 35 USC 119(e) to be afforded right of priority. Correction is required.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-16 are rejected under 35 U.S.C. 101 because they fail to establish a statutory category of invention. Regarding exemplary claim 10, the claim is directed to a system of elements using means-plus-function language. As such, each of the elements can be implemented solely in software (see specification, page 17, lines 21-22). As such the system is composed entirely of software elements, which makes this.

Art Unit: 2143

system, per se, which fails to establish a statutory category of invention. Correction is required.

***Allowable Subject Matter***

4. Claims 1-9 are allowable over the prior art of record.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
